

Logistics Management Services

Integrated into your own supply chain management processes, Logistics Management Services ensure a unique and effective customer-specific program.

Customized to serve your needs

By analyzing current supply chain processes, we create a customized solution that focuses on value in terms of costs, visibility and measurability; we supply the necessary tools and take responsibility for implementing the solution.

Logistics Management Services is intended for large and multinational companies with complex supply chain processes. We add value to logistics functions by using our expertise and systems within your environment to provide you with increased visibility and improved supply chain management.

Integrated into your systems & processes

An extensive and unlimited palette of tools put at your disposal to make your processes more predictable, manageable and controllable.

From simple and standard to complex and unique

- Customized to your needs;
- Integrated using DHL transportation solutions;
- Managed by logistics professionals
- Employ existing, customized, custom-developed and third-party tools;
- Provide vendor-independent visibility and management throughout supply chain.

Increased transparency, optimized manageability

- Enjoy optimal benefits without changing processes;
- Increase predictability, controllability and manageability of logistics service;
- Call on local and global expertise;
- Rely on only the best tools;
- Experience improved vendor compliance.

**Quick & effective
implementations**
